

DISCUSS SUPPLY PROBLEM . . . Left, Mrs. Louise Smith, general chairman of Bay Harbor Osteopathic Hospital Victory Breakfast scheduled for Sept. 20 from 7 a.m. to 1 p.m. at the new hospital structure, 1437 Lomita Blvd., Harbor City, and Mrs. Grace Crawford, president of the Hospital Guild (center with cook's hat), talk over supply problem for the huge breakfast with Warren Akridge, manager of the Western Farms Market at 24020 Normandie Ave., Lomita.

CAMPUS SCENE . . . Surveying sand and cement are incoming coeds of El Camino. Donna Van Trees (l) and Elaine Panousis. Behind them is the Technical Arts building which was expected to be ready for full operation at the beginning of the school year. Strikes caused a delay of several weeks, however, and Oct. 1 is the new target date for opening the facility.

In view of the continuing incidence of runaway trucks on highways a number of bills were enacted dealing with the braking systems of commercial vehicles.

ONE OF THESE will require that every motor vehicle equipped with air brakes must also be equipped with a sound or light device to warn the driver when air pressure drops below a safe level.

Another will require the air-pressure gauge of a braking system to be accurate to within 10 per cent of actual pressure and be of reliable and satisfactory construction.

MANY OF THE other bills affecting brakes relate to valve technicalities and the design to improve the reliability of air brake systems. All become effective on January 1, 1960.

State Senator Takes a Glance At State's New Vehicle Code

By RICHARD RICHARDS
State Senator

More than 100 bills affecting the Motor Vehicle Code were enacted at the 1959 legislative session and signed by the Governor.

Most of them become effective last Friday, and a few on Jan. 1, 1960.

Probably the most important measure in the field of highway safety is the new law establishing a maximum speed limit of 65 miles per hour.

IN THE PAST, enforcement agencies have been under a considerable handicap in obtaining convictions for speed violations, but the new maximum limit is expected to remedy this situation.

In order to allow sufficient time for the posting of new traffic signs, this law will not become effective until Jan. 1, 1960.

A bill to provide greater control of youthful drivers requires reports to the Department of Motor Vehicles of traffic convictions of persons under 21 years of age.

UNDER PREVIOUS law, conviction reports were submitted by only a relatively small number of jurisdictions, with the result that the Department was unable to include juveniles uniformly under its negligent operators program.

The bill, together with legislation directing the Department to consider juveniles on the same basis as adults for purposes of suspending or re-

voking licenses, will facilitate the more efficient administration of safety measures.

A SECOND measure affecting minors applies to the issuance of driver's licenses to persons under the age of 16. Hereafter, except in the case of junior permits which are strictly controlled, an applicant must be 16 years old to obtain a driver's license. Instruction permits, valid for six months, may be applied for at the age of 15 years and six months.
